Part-1

Week-4

1) What is scanning and what are the purpose of scanning?
2) What are the types of scan explain them with example?
3) What are the key technique used in scanning?
4) What are the common scanning method?
5) What are the objective of scanning explain them along with there method?
6) What is network scanning describe about it in detail?
7) What is TCP communication flag?
8) What is port scanning explain it?
9) What is vulnerability scanning explain it?
10) write all of the different types of tools for different types of scanning and explain each of them?
11) What are the types of cryptography explain them?
12) What are the different types of incryption explain them?
13) What is steganography and how it works?
14)

Week-4 Part-II

Date
Page

1) What is Exploit and Payload.
2) Describe all of the types of Exploits.
3) Describe different types of payload.
4) What are the steps of vulnerability Exploitation?
5) What is metaspoit tools and its features?
6) What are the key components of metasploits?
7) What are the basic command in metasploits?
8) ~~what are diff~~
8) What is Wireless security protocol and explain WET, WPA and WPA2.
9) What are the different attack ~~of~~ on wireless networks.
